

Manx Model Flyers

Flypaper – September 2016.

Hi to all,

Just a quick note to postpone this weekend's scale/fun- fly due to the weather forecast for 40plus mph- not conducive for model flying!

A revised date will be forwarded when a judge[s] are available. In the meantime, a few snippets to keep you informed.

The group that went to Southport had a very enjoyable and successful trip. The travel arrangements worked well and they had a great viewing point on the beach. The weather turned out well and there were plenty of planes in the air. Perhaps we should repeat the idea in some form next year.

There was a good turnout on Tuesday at Jurby, and the locking system is back to normal. The weather was excellent with only a slight breeze and everybody, well nearly everybody, had some good flying. I had problems with my Turbulent's elevator and an unexplained noisy vibration which resulted in an emergency landing in the grass. Luckily it was only the wing bolts that suffered. One other model had a heavy landing in the grass but otherwise everybody had some excellent flying.

The evening flying has come to an end now due to the encroaching darkness, but the Creg night was well supported on Wednesday. I have had no feedback yet on the indoor flying— if you are interested let me or any committee member know. There will be a film/simulator night in just over two weeks' time but hopefully there will be some weekend flying in the near future, although it will have to be on the extension as the main airfield is booked up for a couple of weeks.

That's all for now folks, I will be off-Island from next Wednesday for 10 days, so no phone calls please!

Brian King, Chairman
